

Sierra Peaks Section—Angeles Chapter—Sierra Club

SPS PEAKS LIST

20th Edition April 2009 248 Peaks

CHANGE Change from the 19th Edition (August 2001):

- Addition of Caltech Peak.

PEAK INDEX

| | | | | | |
|---------------------|-----------------------|---------------------|---------------------|----------------------|---------------------|
| Abbot - 17.9 | Crag - 1.9 | Goodale - 10.9 | Lola - 24.5 | Piute - 22.12 | Striped - 10.8 |
| Adams - 24.9 | Dade - 17.8 | Goode - 14.8 | Lone Pine - 4.9 | Powell - 15.2 | Table - 7.6 |
| Agassiz - 14.7 | Dana - 21.8 | Gould - 9.4 | Lyell - 21.5 | Prater - 12.3 | Tallac - 23.11 |
| Alta - 6.1 | Darwin - 15.7 | Granite Chief -24.1 | Maclure - 21.4 | Pyramid (N) - 23.9 | Taylor Dome - 1.7 |
| Angora - 2.2 | Davis - 19.5 | Gray - 20.3 | Mallory - 4.3 | Pyramid (S) - 10.6 | Tehipite Dm. - 11.7 |
| Arrow - 10.7 | Deerhorn - 8.5 | Guyot - 3.6 | Marion - 11.2 | Recess - 17.5 | Temple Crag -14.1 |
| Bago - 9.6 | Devils Crags - 13.3 | Haeckel - 15.4 | Matterhorn - 22.9 | Red and White -18.3 | Thompson - 15.1 |
| Baldwin - 18.7 | Diamond - 9.12 | Hale - 5.2 | McAdie - 4.5 | Red Kaweah - 6.9 | Thor - 4.8 |
| Banner - 19.4 | Discks - 23.10 | Half Dome - 20.6 | McDuffie - 13.5 | Red Peak - 20.2 | Three Sisters-11.9 |
| Barnard - 5.6 | Disappointment - 12.7 | Harrington - 11.6 | McGee - 15.11 | Red Slate - 18.4 | Thumb - 12.6 |

| Coyote - 2.3 | Goethe - 16.1 | Lippincott - 6.4 | Pinchot - 10.5 | Stewart - 6.6 | |

PEAKS

The peaks are grouped into 24 geographical areas that are listed in a south to north direction. The names of the 15 emblem peaks are capitalized and marked with **. The names of the 35 mountaineers peaks are marked with *. As noted below, UTM coordinates are given for summits with a questionable location. The cartographer of the 7.5 min. maps seems to have shifted the summit location of Mt Powell and Mt Emerson but the SPS continues to recognize the nearby older and higher location. The 7.5 min. Mount Whitney map has the spelling Mt Chamberlain, but the correct name is probably Chamberlin, which is used on the older 15 min. map.

MAPS

The listed principal map for each peak is the exact title of the USGS topographic map (Calif.) where the peak is located. The auxiliary map column gives maps that are adjacent to the principal map and that are needed for the approach by a frequently used route. The location of the auxiliary map relative to the principal map is shown in

parentheses. For peaks that are near the corner of a map, such as Olancho Peak, additional maps may be needed. These additional maps are not named in the list but their relative location are shown with additional capital letters after semicolons. The USGS has published a useful pamphlet "CALIFORNIA--Index to Topographic and Other Map Coverage," which locates and identifies maps and gives their position codes.

All of the maps are of the 7.5 min, 1:24,000 series. Most have 40 ft contour intervals, but a few have 80 ft intervals. A number of maps in the central Sierra dated in the early 1980's have 20 meter contours and elevations in meters. These maps are identified with the symbol ^ after the name. Elevations from these maps have been converted to feet by dividing by 0.3048 m/ft.

Each topo map carries a code number that identifies the geographic coordinates of its SE corner. The 7.5 min maps in the Sierra cover an area of about 7 by 8.5 miles; therefore these code numbers permit locating peaks on small scale maps to that precision. An alphabetical list of principal maps with code numbers is given on page 8. The older 15 min maps are sometimes preferred; these are identified in the map list.

CLIMBING DIFFICULTY

The climbing class indicates the difficulty of the easiest, but not necessarily the most usual, route on the peak. The classes are

- class 1: Hands-in-pockets hiking on trails or easy cross country.
- class 2: Rough cross-country travel, boulder hopping and use of hands for balance.
- class 3: Handholds are necessary for climbing. Some may want belays.
- class 4: More difficult climbing with considerable exposure. Ropes are used.
- class 5: Technical rock climbing.

Some of the peaks have a summit block classification that is higher than the principal part of the climb. These are shown with the letter *s* followed by the number.

UTM COORDINATES

UTM (Universal Transverse Mercator) coordinates are useful for specifying locations on a map: peaks, campsites, or points on a climbing route. The UTM grid is defined by fine black lines on recent maps and by blue tick marks along the edge of older maps. The lines are one kilometer apart and have a two digit identifying number. A location to the nearest 100 meters is given by a six digit number. The first two digits are the eastward coordinate obtained from the top or bottom edge of the map, and the third digit is the number of tenths of a kilometer to the east of the grid line. The fourth and fifth digits are the northward coordinate obtained from the left or right edge of the map, and the sixth digit is the tenths of a km to the north of the grid line. For example Cartago Peak (012203) is about 200 meters (third digit) east of the north-south grid line that is numbered "01" on the map edge and about 300 meters (sixth digit) north of the east-west grid line that is numbered "20" on the map. A location can be given to a precision of 10 meters by using an eight digit number where the third and fourth digits and the seventh and eighth digits give the fraction of a km to one percent. For example, Cartago Peak is the highest rock pile out of several nearby; its location to a precision of 10 meters is 01152033. A memory aid for the order of the digits is "read right up," i.e., eastward then northward.

MEMBERSHIP

Membership in the SPS is available to current Sierra Club members who climb six peaks on the Peaks List, two of which must be climbed on a scheduled SPS trip. The peaks and dates should be listed on an SPS application form and sent to the SPS Secretary with the subscription fee for the section newsletter, the *Sierra Echo*.

RECOGNITION

Recognition, including emblem pins, is awarded to those members who meet the following requirements and who submit a list of peaks climbed and dates to the SPS Secretary. Also, the emblem and senior emblem have membership time requirements.

- Emblem: Climb 10 of the emblem peaks and 15 additional peaks on the Peaks List and be an SPS member for one year.
- Senior Emblem: Climb 100 peaks on the Peaks List, including all of the emblem peaks, 15 or more of the mountaineers peaks and 2 or more peaks from each of the 24 geographical areas and be a member one year beyond achieving emblem status.
- Master Emblem: Climb 175 peaks on the Peaks List, including all the emblem peaks, 25 of the mountaineers peaks and 4 or more peaks from each of the 24 geographical areas.
- List Completion: Climb all the peaks on the current Peaks List and be an SPS member for at least two years.
- Additional list completions.
- Emblems earned after list completions.

Change to the SPS List

The twentieth edition of the Sierra Peaks Section list adds 8.12, Caltech Peak, 13,832'. The change has the approval of the Keeper of the List and SPS Management Committee.

Respectfully submitted,
Tina Bowman
Keeper of the List

LIST OF MAPS

The code number, which appears on the newer maps below the map name, gives the geographic coordinates of the southeast corner of the map. The first two digits give the latitude, and the next three give the longitude, in degrees. The capital letter designates the latitude, in steps of 7.5', from A at 0.0' to H at 52.5'. The last digit designates the longitude in 7.5' steps from 1 at 0.0' to 8 at 52.5'. For example, the SE corner of the map ABERDEEN (36118H3) is at 36° 52.5' N, 118° 15' E. Note that this ordering of northward, then westward, differs from that for UTM coordinates. A table of these indices for minutes is

| LAT | LONG | MIN | LAT | LONG | MIN |
|-----|------|------|-----|------|------|
| A | 1 | 0.0 | E | 5 | 30.0 |
| B | 2 | 7.5 | F | 6 | 37.5 |
| C | 3 | 15.0 | G | 7 | 45.0 |
| D | 4 | 22.5 | H | 8 | 52.5 |
